

SENSIENT®, THE WORLDWIDE COLOR LEADER, UTILIZES

ADVANCED SCIENCE AND UNRIVALED CAPABILITIES TO DELIVER A BROAD RANGE OF COLORS AND SUPERIOR PRODUCT PERFORMANCE TO THE PAPER INDUSTRY. OUR SCIENTISTS OFFER VERSATILE SOLUTIONS AND RELIABLE PRODUCTS THAT ARE STABLE AND CONSISTENT. FROM NEW PRODUCT INNOVATION TO FINAL PRODUCTION, WE PROVIDE PRODUCTS WITH OUR CUSTOMERS' NEEDS IN MIND, RESULTING IN VALUABLE OPPORTUNITIES TO PROTECT AND BUILD THEIR BRANDS.

Sensient provides a full range of colorants for paper and paper products, including:

- Acid Dyes
- Basic Dyes
- Direct Dyes
- Pigment Dispersions
- Food safe colorants for food packaging

DYE FORMULATIONS

Liquid Dyes - We offer a wide range of liquid colorants that compliment our comprehensive powder dye line. Our liquid dyes are designed and manufactured specifically for paper coloration at various addition points and are used in virtually all areas of paper making due to their physical form, ease of handling, and suitability in systems with automated color control.

Powder Dyes - While liquid dyes may be preferable where automated color control is used, powder dyes remain the product of choice where large volumes are used to produce deep shades. Since powder dyes are three to five times stronger than liquid dyes, smaller amounts of dye are required.

PACKAGING OPTIONS

Pulpable Paper Bags - Sensient provides prepackaged powder dyes in sealed pulpable paper bags. These bags are made from bleached kraft fiber and use a water-soluble adhesive to ensure total container pulpability. This option eliminates dusting, drum handling and disposal, while also providing accurate dye measurement and reduced handling time. This has become the delivery method of choice where large amounts of powder dye are required.

Returnable Drums and Totes - Coordinated through a third-party vendor, our returnable drums and totes are easy to use. Once the container is emptied, the vendor will arrange for it to be picked up, cleaned, and refurbished for the next use.
