

## SENSIPRO™ SPRAY PATTERN INDICATORS OFFER SUPERIOR, CONCENTRATED COLORANT FOR PROFESSIONALLY MANAGED TURF

### ADVANTAGES

- ∴ Temporary dye formulation signals unsightly skips and costly overlaps, while helping to minimize drift
- ∴ Compatible with today's actives, fertilizers, and common tank mix products
- ∴ Aids in identifying clogged nozzles
- ∴ Made with food quality dyes manufactured at Sensient's St. Louis, MO Food Colors facility
- ∴ When used as directed, SensiPro™ spray pattern indicators are safe for people, pets and wildlife
- ∴ Available in liquids, granules, water soluble bags, and a variety of packaging designs

### APPLICATIONS

Use on golf courses, sports fields, and other professionally maintained turf.

Suitable for industrial vegetation management, aquatics and forestry applications.

## SENSIPRO SPRAY PATTERN INDICATORS ARE CONCENTRATED FOR LOW USE RATES IN LIQUID SPRAY SOLUTIONS

- Available in a variety of colors:
  - SensiPro™ Blue High-Concentrate Liquid and Granule
  - SensiPro™ Blue Liquid
  - SensiPro™ Green Liquid and Granule
  - SensiPro™ Red Liquid and Granule
- Formulation developed for commercial turf grass, industrial vegetation management and aquatics applications
- Temporary colorant will dissipate and blend into grass over time for discreet applications
- Suggested use rates will vary with each product and turf; retain mix rate records as a reference for future spray application
- SensiPro™ spray pattern dyes can be used on all standard spray equipment
- Custom blends, private labeling, and package designs available by request
